

## NCB825MA New Construction Bracket

The NCB825MA Multi-angle New Construction Bracket is a breakthrough for whole house audio and commercial ceiling speaker installations. Designed for most of OSD 6.5" in-ceiling round speakers, the NCB825MA includes stud wings that offer more placement flexibility than standard brackets. The stud wings can be positioned to hold the bracket in between ceiling joists or angled to place the speaker closer to the ceiling corners for improved sound quality in a surround sound scenario or to avoid obstructions that prevent optimal speaker placement. Fits speakers with 7.75" - 8.25" cut out dimensions.

### FEATURES

- New construction bracket for 6.5" OSD ceiling speakers
- Mounts standard in between joists or angled to accommodate various mounting options
- Includes moveable stud wing design for maximum speaker placement flexibility
- Includes mounting ring and two stud rings
