

NERO WRSKII Wireless Rear Speaker

The NERO WRSKII 5.8 GHz Wireless Rear Speaker Kit with Sub Out lets you enjoy all the acoustic benefits of a 5.1 surround sound system without the hassle or lack of access to running speaker wire from your home theater receiver to the rear surround speakers. This compact wireless surround sound kit includes a transmitter/receiver that sends the audio signal using the faster and more reliable 5.8 GHz frequency from your amplifier/receiver to the rear surround 2-channel amplifier where the surround speakers connect using the speaker wire supplied with the kit. The kit also includes an input/output to connect a powered subwoofer for a complete 5.1 experience.
